Introduction

The Healthcare Omni-Channel Gateway uses the Error Code as an amount, in cents, as well as even/odd logic to trigger expected responses.

Amount Triggers

Approved

Any even amount not listed in the Error Code List table will result in an Approved outcome.

Example: \$1.00, \$0.52, \$57.52

Declined

Any odd amount, or an amount listed in the Error Code List table which would be considered a Decline will result in a Decline outcome.

Example: \$0.12, \$0.53, \$57.55

Error

Any amount listed in the Error Code List table which would be considered an Error will result in an Error outcome.

Example: \$0.01, \$10.00, \$20.03
